Submittal Sheet #

Wet-N-Stick

Product:	Item#	Description	Unit Pack
	GWNS125	Grabber WET-N-STICK™ 2 1/16" x 125'	
	GWNS250	Grabber WET-N-STICK™ 2 1/16" x 250'	

Application: The product must be totally immersed in water. Apply water saturated tape over joint, reposition as necessary. Smooth tape with wet sponge or by hand to eliminate bubbles or blisters. Allow to dry, apply finish coat. Drying times may vary with temperature, humidity and ventilation.

Description: The patent pending Wet-N-Stick™ technology combines a specially formulated adhesive activated by simple tap water (rapid dry additives cannot be added) and the very best in drywall paper. Without the usual initial coat of compound, this joint tape with its perforations dries faster than conventionally installed joint tape using NO MUD! The taping process that once took two days to reach the stage for the final coat is now a one-day job.
