

Joist Jaw

Joist Jaw™

A Builder's Extra Hands

Grabber's Joist Jaw is the perfect accessory for the professional wood framer. Like a second pair of hands, the Joist Jaw holds up the rafters and joists. The Joist Jaw automatically levels the crossmember with the rimjoist or ledger giving the framer a "hands free" position while installing the joist hanger or other connectors. With just a couple of twists, the Joist Jaw clamps down on its target from the top or the bottom and holds lumber tight! This tool increases the accuracy and production of a 2 man framing crew whether they're building a deck, a roof or a floor, saving time and money. The joist jaw is reusable and made of zinc plated durable steel. Each package comes complete with 2 Joist Jaws.
