SuperDrive N7 indexing modules have been redesigned to snap-on to Makita and DeWalt drivers in just seconds. N7 is a game-changer!

N7 is ideal for metal framing and drywall attachment and is designed for fastener lengths from 3/4” to 2” and 6-8 gauge.

KEY ADVANTAGES
- Available for DeWalt and Makita tools
- Snaps on to DeWalt and Makita drivers in seconds
- No couplers or conversion required.
- N7 uses a widely accepted tape collation system
  - A wider selection of collated fasteners are available than other systems.
  - Tape collation makes it possible to reach into more spaces than rope or other collation systems.
  - 50 screws per strip means staying on task longer and fewer change outs compared to other systems.
- Adjust for fastener length with a click of a button
- SureLock™ fine depth control adjustment
- Rounded nose piece won’t damage drywall or other sheathing
