**Performance data:**

Average shear value 5900 lbs. Average pull-out value 2950 lbs. Improved performance as shown by shear and pullout values indicates Grabber's advanced design. Ultimate values obtained through INDEPENDENT TESTING. Shear test per SAE 495. Holding power depends on the quality of the lumber material being used. These figures indicate average ultimate values. A safety factor of 4:1 is generally accepted as a safe working load however, reference should always be made to applicable building codes for specific safe working ratios.
