

GRABBER®

Fasteners for Hard Woods

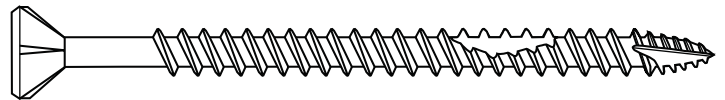

IronWorker™

Designed for the mahogany family of woods

Available in
Mill Finish
or
Color Match Rosy Brown

#2 Phillips Drive

Grabber's hardwood deck screw with its patented double cut threads is designed specifically for use with hard woods. Utilizing a self starting point and an aggressive self-countersinking head, the hardwood deck screw is a good choice to help prevent wood cracking or splitting*, a common problem for mahoganies. The hardwood deck screw's stainless steel composition is compatible with cedar, cypress and redwoods.

*Pre-drilling and counter-sinking may be necessary at board ends; test fastening is recommended.

- ▶ **Self drilling**
- ▶ **Self countersinking**
- ▶ **Self tapping**
- ▶ **Patented double cut threads**
- ▶ **High strength 305 stainless steel**
